## ABOUT US

At **TechMileage** we combine technical expertise with proven experience to produce the best possible IT solutions. Our solutions are high quality, cost-effective and bring life to your business. We are committed to providing better, innovative, cutting edge and quality solutions to our clients.

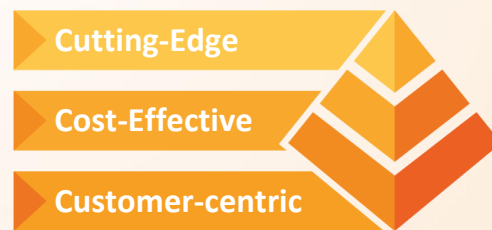

**“ Our relationship with our clients is a partnership – we bring our experience, best practices and tools and apply them to our clients’ unique requirements.”**

Three fundamental objectives guide the operation of our business:

1. To use our expertise to the benefit of our clients and partners through an open, collaborative approach
2. To ensure sustainable and profitable long-term growth
3. To promote customer development

In addition to these goals, a formalized set of shared values guides our business decisions and shapes our culture.

**“ We develop business strategies and technology solutions tailored to your unique requirements.”**

In the field, we bring our passion, integrity and innovation to each of our clients’ projects. Whether it is applying the best technology or bringing our experienced thought process, all our projects are dealt with the highest standards.

*TechMileage helps clients deal with dynamic business and technology challenges. Clients choose TechMileage because of the outstanding value and results we deliver.*

## OUR SERVICES

### Application Development Services

TechMileage Application Development Services revolve around the latest tools and technologies. We focus on IBM and Microsoft, as well as open source technologies. Areas of expertise include:

- Enterprise Web and Mobile Applications
- Business Intelligence, ETL and Data Management
- Data Warehousing
- Database Development and Modeling
- Support and Maintenance

The TechMileage Team has implemented several complex applications with PCI and HIPPA-compliant features on different Web and Mobile Platforms. TechMileage Team can build or enhance your mission-critical applications to ensure reliable delivery of the service you need to compete in today's marketplace.

### Big Data and Advanced Analytics

The TechMileage Team has extensive experience in Big Data Technologies. We understand the power of Big Data and can help you implement it as a part of your strategy. Along with Big Data we have extensive experience in Advanced Analytics and predictive Modelling. Our experience can help you optimize full customer life cycles from acquisition to retention and risk management. Several of our clients, including those with multi-billion dollar portfolios, are using our services on these technologies successfully.

### Quality Assurance & Testing Services

Your applications play a critical role in delivering products and services quickly in today's always-on, IT-pervasive world. Our quality assurance and testing services deliver a comprehensive solution that minimizes application failures and helps you achieve business results you can measure. We improve the quality of your business applications by reducing defects. In addition, rework costs are reduced throughout your systems development life cycle, not just at the testing phase.

TechMileage provides Automated and Manual QA services on Web, Mobile and other platforms. TechMileage has developed an Automation Framework to enhance the reusability of our work.

### Cloud, Infrastructure & Support Services

Today's Marketplace demands that your Information Technology (IT) infrastructure be efficient, flexible, dependable and compliant while optimizing your IT return on investment.

TechMileage can help you achieve this by making your IT environment safe, secure, efficient and adaptable. We deliver a comprehensive set of infrastructure & support services, including cloud-based solutions.

### Security Services

TechMileage can ensure that your applications are PCI or HIPPA compliant.

## TESTIMONIALS

“TechMileage has provided top tier Java and WebSphere development skills for my company on many occasions. Their personnel are verified and published experts in the field of Service-Oriented Architecture and understand how to leverage the technology for the most business productivity value. If you want to get the most value from your technology investments, ensure TechMileage is leading the way as your trusted advisor.”

**Michael Chapman** | Director, Professional Services, Yorel Integrated Solutions

“It is my pleasure to recommend TechMileage LLC for development of Mobile and Software applications. They have helped us with iPad (iOS) application development, introducing the latest market technology and reducing manual work. They executed the development of our iPad application end to end in collaboration with our existing staff. They captured and documented the requirements, designed the product and built it as per expectations. TechMileage frequently provided ideas to enhance the product for best use in our company. The product is currently in production and performing as expected. Working with TechMileage LLC has been a great experience overall. Once again, I will highly recommend them for custom software applications.”

**Scott Hansbury** | Vice President, CHC
